PROFESSIONAL SUMMARY

Senior Software Developer with ~3 years of experience in full-stack web and mobile app development. Strong ownership across frontend, backend, databases, messaging systems, and deployments. Experienced in automation, scalable architectures, and cross-team collaboration.

WORK EXPERIENCE

Senior Software Design Engineer | Delta Electronics | Apr 2025 – Present

- Owned end-to-end delivery of web and mobile platforms, covering frontend, backend, databases, microservices, and deployments.
- Designed and maintained scalable microservices, automated workflows using schedulers, and handled Docker-based deployments with GitLab CI/CD.
- Led system-level troubleshooting, production releases, and cross-functional collaboration to resolve critical issues.

Software Design Engineer | Delta Electronics | Sep 2023 – Apr 2025

- Developed and maintained backend services and frontend modules across multiple web platforms.
- Implemented database integrations, REST APIs, and microservices, contributing to system stability and feature delivery.
- Participated in production support, bug fixes, code reviews, and cross-team coordination for feature rollouts.

Software Engineering Intern | Delta Electronics | Mar 2023 – Sep 2023

- Learned backend and frontend fundamentals using Node.js, Python, Angular, and React, while assisting senior engineers in feature development.
- Supported API integration, database operations, debugging, and small feature enhancements across internal web platforms.
- Gained hands-on exposure to Linux environments, Docker basics, Git workflows, and collaborative development practices.

PROJECTS

HES – AMI Web Platform

- End-to-end ownership of frontend, backend, databases, and microservices
- Frontend: Angular | Backend: Node.js + Python, Owned critical components including remote operations, involving close coordination with firmware teams.
- Designed and maintained key microservices (registration, reporting, scheduling), Implemented automation and contributed to scalable, stable architecture

EVCS Platforms (Web & Mobile)

- Built a PHP-based internal web application with frontend and database integration for report/download workflows.
- Developed customer-facing React Native mobile application,Implemented backend microservices using Node.js (transactions, reservations, communication)
- Worked with RabbitMQ and Socket.IO for asynchronous processing and real-time communication.

DRMS – TPS Web Platform

- Full-stack ownership.
- Responsible for feature development, bug fixing, microservices development, and deployments.
- Worked with RabbitMQ and Socket.IO for asynchronous processing and real-time communication.

TECHNICAL SKILLS

Programming Languages

- C
- C++
- JavaScript
- Python
- TypeScript
- PHP
- C#

Frontend Technologies

- Angular
- React
- React Native

Backend Technologies

- Node.js
- Python
- .NET
- PHP

Databases

- MySQL
- MongoDB (NoSQL)
- PostgreSQL
- SQLite

DevOps & Systems

- Docker
- GitLab CI/CD
- Linux
- Git-based workflows

EDUCATION

2019 - 2023	Bachelor of Technology - Electrical and Electronics University Visvesvaraya College Of Engineering - K R circle, Bangalore	8.60 CGPA
2019	PUC / 12th Govt P U College Majalatti, Belagavi	89.66%
2017	SSLC / 10th Sri G B Patil High school Harugeri-Cross	95.36%
