Rohith Gowda R M

+91-9611914253 | rmrohithgowda@gmail.com | LinkedIn | GitHub | Bengaluru, India

Professional Summary

DevOps & Cloud Engineer with **4+ years of experience** designing and implementing CI/CD automation, cloud infrastructure, platform engineering, release management, and observability solutions. Sole owner of CI/CD infrastructure for a **35-member engineering organization**, reducing deployment effort by **50%**, deployment failures by **30%**, and release cycle time by **40%**. Experienced in building and managing cloud-native platforms using **AWS**, **Azure**, **Docker**, **Kubernetes**, **Terraform**, **Ansible**, **Jenkins**, **GitLab CI/CD**, **GitHub Actions**, **Prometheus**, and **Grafana**. Recognized at Delta's Global Innovation Event in Taiwan for leading enterprise-wide CI/CD modernization initiatives and driving DevOps adoption across engineering teams.

Technical Skills

Cloud Technologies: AWS, Microsoft Azure, GCP (Fundamentals)
Container Technologies: Docker, Kubernetes, Amazon EKS, Azure Kubernetes Service (AKS), Helm
Infrastructure as Code: Terraform, OpenTofu, Terramate
Configuration Management: Ansible
CI/CD & GitOps: GitLab CI/CD, GitHub Actions, Jenkins, ArgoCD, GitOps, SonarQube, Nexus Repository
Scripting: Bash, Python, PowerShell
Version Control System: Git, GitHub, GitLab
Monitoring: Prometheus, Grafana, OpenTelemetry, Azure Monitor, Application Insights
Operating Systems: Linux, Windows Server

Professional Experience

Delta Electronics India Pvt. Ltd. Apr 2024 – Present
DevOps Engineer (Senior Software Design Engineer) *Bengaluru, India*

- Designed and owned enterprise **GitLab CI/CD** pipelines integrating automated build validation, SonarQube quality gates, artifact management, staged deployments, rollback strategies, and release orchestration across multiple production applications.
- Owned CI/CD infrastructure for a **35-member engineering organization**, reducing deployment effort by **50%**, deployment failures by **30%**, and release cycle time by **40%** through pipeline standardization and automation.
- Containerized **microservices** enterprise applications using **Docker** and drove Kubernetes adoption through proof-of-concepts, deployment standardization, ingress configuration, service exposure patterns, and operational best practices.
- Implemented Infrastructure as Code using **Terraform**, including reusable modules, remote state management with **S3 backend**, and state locking using **DynamoDB** for collaborative infrastructure provisioning workflows.
- Worked extensively with **AWS** services including EC2, EKS, IAM, VPC, Route53, Application Load Balancer (ALB), and S3 for cloud-native application deployment and infrastructure management.
- Configured Route53 hosted zones, ALB integrations, Kubernetes Ingress Controllers, and custom domain routing strategies for containerized workloads running on Kubernetes clusters.
- Architected distributed execution platform using Azure Queue Storage, Azure VM, and Blob Storage enabling centralized build orchestration, automated artifact generation, and asynchronous execution workflows.
- Managed cloud-hosted enterprise applications supporting **100K+ users** across Azure infrastructure, ensuring **high availability**, platform reliability, production stability, and operational excellence.
- Introduced Git branching strategies, repository governance, webhook integrations, and CI/CD best practices improving collaboration, traceability, and release consistency across engineering teams.
- Led knowledge-sharing sessions on Kubernetes, CI/CD automation, DevOps practices, and cloud-native engineering, enabling onboarding and adoption across development teams.
- Coordinated production deployments, incident response, hotfix releases, root-cause analysis, and operational troubleshooting while maintaining high system availability and minimizing business impact.
- Presented enterprise CI/CD modernization initiative at Delta IABG Global Innovation Event in Taiwan following organization-wide innovation recognition.

Delta Electronics India Pvt. Ltd. Mar 2022 – Apr 2024
Software Design Engineer *Bengaluru, India*

- Developed enterprise applications and platform services using **ASP.NET Core** and C# supporting industrial automation systems used by **100K+ users**.

- Implemented **Jenkins**-based CI/CD workflows for automated testing, deployment automation, release engineering, and production delivery processes.
- Optimized enterprise search infrastructure reducing response times to **150–200ms** using ElasticSearch indexing strategies, query optimization, and Full-Text Search techniques.
- Designed and implemented Azure AD B2C authentication, RBAC authorization models, and enterprise identity management workflows across web and desktop platforms.
- Automated QA validation and deployment activities using Selenium-based automation frameworks and release engineering utilities improving delivery efficiency.
- Modernized legacy ASP.NET MVC services to ASP.NET Core improving deployment flexibility, containerization readiness, and CI/CD pipeline compatibility.
- Standardized API documentation using Swagger/OpenAPI improving developer onboarding and reducing integration overhead across engineering teams.
- Collaborated closely with infrastructure, QA, and release engineering teams supporting production deployments, debugging, hotfix releases, and operational support activities.

Key Projects

DIAStudio Copilot Infrastructure | *Azure, OpenTofu, Terramate, Azure Monitor, Application Insights*

- Owned Infrastructure as Code development using **OpenTofu** and **Terramate**, implementing Azure infrastructure, reusable modules, deployment plans, and production operations for an **AI-powered enterprise chatbot** platform.
- Configured and maintained monitoring using **Azure Monitor**, **Log Analytics**, and **Application Insights**, enabling infrastructure health tracking, performance monitoring, and incident response for AI-powered enterprise services.

CI/CD Modernization Initiative | *GitLab CI/CD, Jenkins, SonarQube, Nexus, YAML*

- Spearheaded organization-wide CI/CD modernization with YAML-based pipelines covering build, test, staged deployment, production approval gates, rollback, and artifact management.
- Selected as organization innovation champion — presented at Delta IABG Global Innovation Event in Taiwan, 2026.

Distributed Remote Compilation Platform | *Azure Queue Storage, Azure VM, Blob Storage*

- Built asynchronous distributed execution platform enabling centralized APK generation without customer-side Visual Studio licensing with average execution time of **5–6 minutes** per job.

Education

MS Ramaiah Institute of Technology — Bengaluru, India
B.E. in Electronics & Communication Engineering | CGPA: 8.64 — *2018 – 2022*

Jawahar Navodaya Vidyalaya, Doddaballapura — Karnataka, India
CBSE Senior Secondary (Class XII) | 91% — *2016 – 2018*

Achievements

Global Innovation Recognition — Taiwan | *2026*

- Selected to represent the India engineering team and present enterprise CI/CD modernization initiative at Delta IABG Global Innovation Event in Taiwan.

Individual Excellence Award | *2025*

- Recognized for contributions toward CI/CD modernization, deployment automation, DevOps innovation, and release engineering improvements.

Delta Quarterly Champion | *Q3 2024*

- Awarded for delivering enterprise platform improvements, automation initiatives, and engineering productivity enhancements.
